Oakdale

The Oakdale Research Facility is located at The University of Iowa Oakdale Campus, one mile north of Interstate 80 (exit 240) on Highway 965.

Map / Directions for Oakdale Research Facility:

The Oakdale Facility is housed in a blue steel building on the west edge of the Oakdale Campus on Old Farmstead Road. The 10,800 sq. ft. building serves as a center for geologic research and houses the [Iowa Geological Survey's Rock Library](#) (the repository for drill core and chip samples, as well as samples collected from exposures throughout Iowa). The facility includes stations for core logging, processing and microscopic [study of drill samples and production of striplogs](#), laboratories for the processing of microfossils, and stations for the entry of data into the [Iowa Geological Survey's data bases](#). Additionally, it is used for equipment maintenance and storage, fabrication of equipment, and for publication and file storage.
